What To Expect

Better Than The Others

Cutting Edge Technology

Transform your asset management with cutting-edge digital twin technology and real-time data integration.

Predict And Prevent

Stay ahead with predictive maintenance and actionable insights, reducing downtime and optimizing performance.

Seamless Integration

Effortlessly integrate with your existing systems for a smooth transition and enhanced functionality.

Detailed Plan Information

Basic Plan

Perfect for small teams or companies, the Basic plan simplifies asset and maintenance management with essential features such as asset registration, hierarchical organization, scheduled maintenance, and digital logs. Streamline operations efficiently while laying the foundation for scalable growth with Clanos.

Asset Management

Efficiently register and categorize your assets with a clear hierarchical structure, ensuring easy navigation and organization. Manage essential documents seamlessly, providing quick access to critical information and maintaining up-to-date records.

Maintenance Management

Streamline your maintenance operations with robust work order management, allowing for easy tracking and completion of tasks. Schedule maintenance activities in advance with comprehensive maintenance plans, and utilize recurring checklists and digital logs to ensure consistent and reliable upkeep of your assets.

Operational Efficiency

Enhance your operational workflows with a comprehensive tasks library, enabling standardized procedures and task management. Conduct thorough audits and inspections to maintain regulatory compliance and operational standards. Generate detailed reports to gain insights into asset performance and maintenance activities. Ensure secure processes with an approval system and e-signature capabilities.

Detailed Plan Information

Advanced Plan

Perfect for growing teams and mid-sized companies, the Advanced plan builds on the Basic plan with enhanced features such as 3D asset integration, live data visualization, and condition monitoring. This plan offers robust tools for team management, downtime reporting, and custom safety recommendations, making it ideal for companies looking to optimize asset performance and streamline operations more effectively.

Asset Integration and Access

Enhance your asset management with 3D model integration, accessible via augmented reality (AR) for a more immersive experience. Quickly access asset information with instant QR code scanning, ensuring efficiency and accuracy.

Live Data and Visualization

Leverage live data integration and visualization to monitor real-time asset performance. Utilize the asset dashboard for a comprehensive overview, enabling informed decision-making.

Monitoring and Maintenance

Implement condition monitoring to proactively manage asset health. Benefit from prescriptive maintenance and downtime reporting (MTTR, MTBF), alarm registration and history, and team-based work orders to optimize maintenance activities. Monitor issues and set conditions through detailed checklists and log sheets.

Safety and Customization

Enhance workplace safety with custom safety recommendations (PPE) and create global templates for checklists and logs, up to 10 templates, for consistent operations.

Detailed Plan Information

Premium Plan

Ideal for large organizations, the Premium plan includes all features of the Advanced plan, plus advanced KPI dashboards, AR-enabled instruction manuals, and a mobile application. With unlimited template creation and the ability to compare design data with actual asset performance, this plan empowers businesses to achieve the highest level of operational efficiency and asset reliability, ensuring seamless management and growth.

Advanced Analytics and Visualization

Utilize KPI dashboards to track key performance indicators across people, processes, and machines. Empower your team with AR-enabled instruction manuals for enhanced operational guidance.

Mobile and Remote Access

Access Clonos on-the-go with a dedicated mobile application, ensuring your team can manage assets and maintenance tasks from anywhere.

Asset Comparison and Customization

Compare design specifications with actual asset data to identify discrepancies and improvements. Enjoy unlimited template creation for tailored maintenance and reporting processes.
